HANNA MAMEDAVA

+48 575 242 764   hanna.kuzich@gmail.com   **PORTFOLIO**   **GITHUB**   **LINKEDIN**

SKILLS

Languages: Javascript, Typescript, HTML, CSS
Frameworks/Tools: React, Angular, Redux, AWS, Git, Figma, Material UI, Wix, Tilda
Key Skills: Object-Oriented Programming (OOP), Scrum Methodologies

EXPERIENCE

Frontend Developer
https://intelit.org/ (part-time)   *July 2023 - till now*
- developed landing pages based on Figma designs using the Tilda platform.

https://finscraper.com/   May 2023 - till now
- enhanced application usability through HTML, CSS, and Bootstrap 5 optimization.
- adapted the existing view of the application to mobile devices.

upwork.com (freelance/part-time)   Jan 2023 - till now
- created 3 dashboard web platforms using HTML/CSS, Bootstrap and TS from Figma design.
- implemented responsive adaptation of the application's view for mobile devices.

Student / Angular Frontend Developer
https://www.epam.com/   Nov 2022 - Jan 2023
- created a bookstore starting page with the list of products received from API using Angular features.
- collaborated with the project team in an Agile manner, following the Scrum methodology, to ensure a seamless and continuous development process.
- conducted a code review.

PROJECTS(Nov 2022 – till now)

Dizi IZI (NextJS, Redux, HTML5, CSS3, Material UI, Git, Vercel)   live
2D visualisation platform of the living room that allows to obtain attractive visuals of a furniture.
- developed a reusable component library.
- implemented authentication forms with React Hook Forms and Zod schema validation for a better user experience by ensuring data accuracy, error prevention, and a smoother, more secure authentication process.

TryppleA (Wix constructor)   live
Landing page for AI Agency.
- create page content and develop user-friendly design in a short time for prompt demonstration purposes.

GraphQl Editor (ReactJS, Redux, HTML5, CSS3, Material UI, Git, Netlify, Firebase)   live | github
A graphical, interactive, in-browser GraphQL IDE inspired by Apollo Graphql.
- incorporated React-Redux hooks and Redux selector patterns to architect highly scalable front-end state management.
- ensured user privacy through frontend and backend authentication measures and React Router, allowing users to only access and make changes to their own projects when logged in

Project Management Application (Angular, RxJS, NgRx, Angular Material, Git, Netlify)   live | github
An agile project management tool inspired by Github Pages that allows users to manage projects and project tasks.
- Collaborated with the team of 3 developers, utilising efficient git and pull requests workflow in order to minimise potential merge conflicts.
- implemented centralised state management, leading to improved maintainability, predictable state changes.

EDUCATION

Frontend Development - *The Rolling Scopes School* | *March 2022 - May 2023,* **Belarussian State University** | *2012 - 2017*
